# Custom Work Platforms

**From design to fabrication we can customize any work platform to meet your needs.**

We have designed and built many different work platforms for all industries. These platforms provide a safe work environment reducing any risk of falling at various heights. They also provide employees the ability to work at an ergonomically correct height, reducing the risk of stress related injuries.

Examples of our portable and stationary work platforms

# Custom Material Handling

## Custom Fabricated Equipment

We design custom material handling equipment for many different applications and settings. Some of these include custom designed workstation jibs, manipulators, bridge cranes, and custom lifting and tilting equipment.

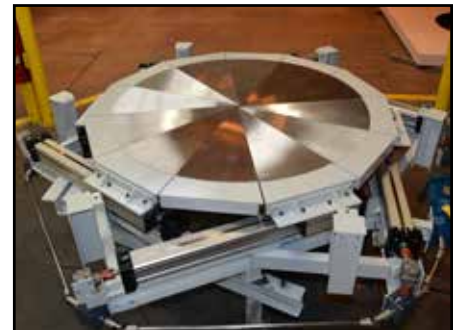

This custom manipulator allows our customer to work on transmission housings. The manipulator is completely automatic and allows transmission housings to be lifted up and down and rotated clockwise and counterclockwise.

Custom built 2-axis fixture mounted to the top of a telescoping column. Designed to rotate the tool and part through the CG, providing balanced movement.

Custom lift designed and engineered to hold, turn, and rotate a large fixture for the United States Space Program.

A platform design built to close 360 degrees around a cylindrical product providing access to the centered work piece

## Height Adjustable Platforms

Adjustable height work platforms adjust the work surface to ergonomically correct heights when working with height changes. Our design and build team will account for the material, height, adjustment requirements, dimensions, and more when creating the work platform.

# Wire Partitions & Safety/Security Guarding

## Wire Partitions

Secure your property with a Wire Mesh Partition system. Made to fit, our modular wire mesh partitions deliver 24-hour security while its all-steel construction resists wear and requires no maintenance. Various styles and types are available. Fits various applications. Wire fencing can be customized to match the color of your shop.

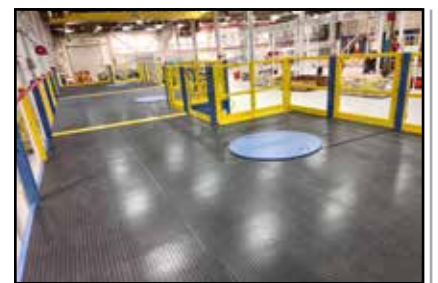

## Safety Gates

Durable gates require no electric, are reliable, affordable, easy to install, and are the only gate "you can never leave open." Multiple models available for various applications.

## Mezzanines

**Transform unused overhead space into space that works.** Free-standing mezzanines are designed to satisfy your need for additional space by maximizing the use of existing areas. They offer you virtually unlimited options for modifying your present interior spatial configuration. As a result, you can increase your usable floor space without the expense of modifying the building layout or moving into a larger facility.

# Modular Offices

- **One- or Two-Story Offices**
- **Clean Rooms**
- **Multiple Office Systems**
- **Pre-Engineered for Fast, Easy Installation**

From a single office to two-story multiple office systems, no job is too small or too large. Modular office systems provide flexible solutions to fit changing needs. Administrative offices, shipping and receiving offices, cafeterias and break rooms, conference rooms, clean rooms, plant foreman's office, or computer and engineering labs are all possible and in about 25% of the time permanent construction would take. Drastically reduce downtime with no mess, dust, or debris. We offer on-site assembly.

## SoftWall Enclosures & Curtains

Custom-designed SoftWall enclosures, partitions, and curtains

- Air quality/dust particulate
- Cross-contamination
- Environmental rooms
- Fumes/odor
- Packaging lines
- Temperature/humidity control
- Wash down/overspray

# Configured or Custom Cranes

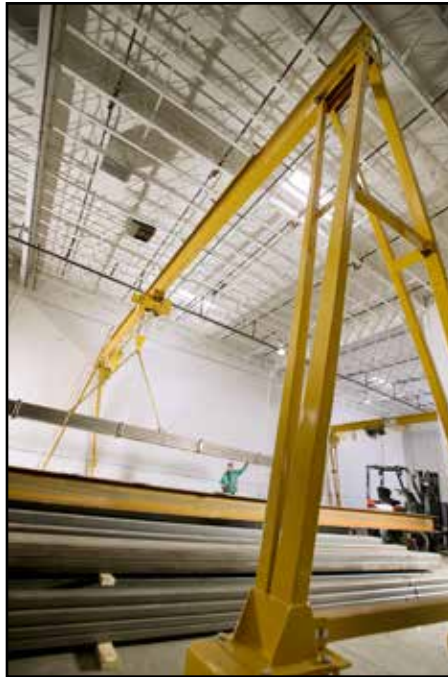

## **Workstation bridge cranes**

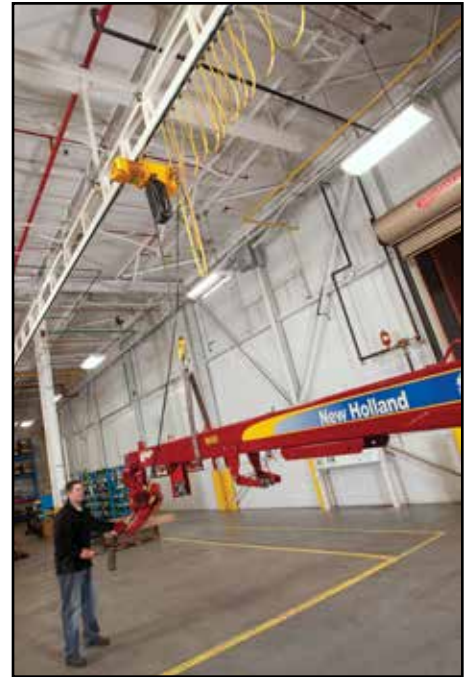

Overhead material handling systems with parallel runways and a bridge that supports the hoist.

**Jib cranes** Overhead crane system that completes repetitive lifting tasks in circular area of coverage.

**Gantry cranes** have a beam supported by two legs at both ends and travel on swivel casters or rails to work a specific area.

**Monorail cranes** move loads along a fixed path to relocate materials in a specific area.

# Fall Protection

Our comprehensive range of products meet the requirements of even the most challenging environments. We offer site survey & consultation, design & engineering, as well as installation & training. To maintain the highest level of quality, every system part and manufactured component is thoroughly inspected, processed and supplied in accordance with our ISO 9001:2015 program.

# Lifts

## Elevating Worker Platforms

Designed for safety and flexibility

## Portable Lifts

Easy-rolling casters for unmatched maneuverability

## Low-Profile Lifts

Easily adjustable and accessible

## Self-Leveling Loaders

Keep loads at the ideal height for building or breaking down pallet loads.

## Pallet Inverters

Ruggedly designed to invert pallet loads up to 48"x48"x84".

## Portable Container Tilters

Position baskets so parts are easily accessible.

## Fully Customized Lifts

Custom-engineered lifts for one-of-a-kind solutions.

## Power-Stackers

A variety of models to satisfy any requirement including servicing racks up to 12 feet high.

## Mobile Lift Transporters

Position and transport lighter loads to promote worker productivity while reducing the risk of injury.

# Workstations

Ergonomic workstations can be individually designed to meet the specific needs of the end user for a variety of industries and applications. Multiple options and accessories available.

# Storage Solutions

## Modular Cabinets/Shelving

With an attractive appearance, our storage systems are appropriate for office or factory use. They allow you to arrange your work space in a harmonious and aesthetic fashion. The storage system can evolve with the pace of your business by adding drawers and various accessories.

**Mobile storage, vertical storage, modular drawers, shelving systems—  
the possibilities are endless!**

# Storage Solutions

## Wire Shelving & Storage Cabinets

We offer a vast array of storage & productivity products including wire shelving, advanced polymer shelving, storage cabinets, Built in Bin Storage cabinets, high-density shelving, wall storage systems, stainless fabricated products, security storage and much more.

Super-adjustable shelves are very easy to adjust.

Hanging systems accommodate bins to create stationary and mobile storage centers

Color code inventory with 13 sizes and 3 colors

## Industrial Handling Trays

Industrial trays, wash boxes, ventilation trays, drying trays, and a full line of ESD trays and boxes. High-strength, glass-reinforced composite containers, trays, boxes, flats, and totes for material handling in the metalworking, plastics, and electronics assembly industries, as well as in food service, confectionery, gardening, insect rearing, cannabis, and pharmaceutical processing.

# Racking Systems

Whether your need is a few bays of pallet rack or assistance with design and installation of an entire warehouse system, we have the experience and capability of handling all of your material handling needs.

## Pallet Racks

## Cantilever Racks

Custom glide-out with jig.

## Die Storage Glide-Outs

Optimize both floor and vertical space, increase efficiency, and facilitate a safe work environment.

Cantilever Roll-Out Rack Manual Crank stores heavy, large items easily.

Glide-out for underground drill bits.

# Conveyor Systems

We can solve your material handling challenges with specific conveying solutions built for industrial environments. We have the knowledge and experience to create a conveyor system specific to your application. We offer a full line of steel belt conveyors, rubber belt conveyors, plastic belt conveyors, and roller conveyors in both standard and custom versions.

# Mobile Powered Carts

Mobile powered carts provide workers with everything needed for maximum productivity, right at their fingertips. A vast array of options and adaptable ergonomics ensure great performance. Power options include sealed lead-acid and lithium-based (including hot-swappable options) power systems. Allow us to help find the cart and power system best suited for your budget and application.

# Material Lifts

VRC Material Lifts provide an economical, dependable, and safe method of high-capacity freight movement between levels. Warner Specialty Products can design you a VRC or material lift to meet your needs and specifications.

## Standard and Custom Carts

Standard carts available in a large variety of sizes and materials. Custom fabrications are designed and engineered for applications where standard products fall short of your needs.

# Ergonomic Products

## Ergonomic Lift Assist Devices

**Toolholding Series Arms** hold tools and instruments up to 132 lbs. in a weightless state for the operator. Allows increased precision with full range of motion in lockable joints and the ability to safely absorb substantial torque reaction during operation. Designed to improve productivity and eliminate injury and fatigue. Thousands of configurations are available to suit every possible application.

**Portable ergonomic lifters** offer dynamic load handling characteristics for heavy load capacities.

**The Manipulator** is a powerful lift assistance arm for precision orientation and placement of heavy parts up to 110 lbs. safely and efficiently.

## Matting

Ergonomic matting solutions for various applications

- Custom
- Anti-microbial
- ESD
- Anti-slip
- Clean rooms
- Modular
- Anti-Fatigue Matting
- Runners and matting rolls
- Cable and hose protection
- Chemical Resistant
- Floor tape and accessories

# Ergonomic Seating

## Office Seating

Customize your seating experience by designing your chair to your exact specifications. Select from a range of options, including ergonomic adjustments, glides/casters, base styles, color/material, arms, height range, etc.

## ESD Seating

ESD-safe seating solutions can help maintain work areas within ANSI/ESD STM12.1-2019 standards.

## Clean Room Seating

Chairs and stools designed to meet the particulate goals of ISO 14644-1 with testing to certify ISO 4, ISO 5, ISO 6 and ISO 7 compliance

## Welding Chairs/Stools

Specifically designed for durability, comfort, and ergonomic positioning in a welding environment. The long-lasting, flame-resistant suede resists the intense heat and flame emitted by welding tools. Countless options available.

## Manufacturing

Designed to maximize worker productivity while providing optimal comfort for situations specific to the field.
